

with Optical Dirt Sensors and Touchpad Controls

Introducing the NEW Roomba 700 Series

INCLUDES

- | | | |
|--------------------------------------|--------------------------------|-----------------------|
| • 1 iRobot Roomba 780.03 | • 1 power supply | • Extra flapper brush |
| • 1 AeroVac™ Series 2 bin | • 1 rechargeable battery | • Extra side brush |
| • 2 Virtual Wall Lighthouses | • Instructional DVD in the box | • Cleaning tool |
| • 1 Compact, self charging Home Base | • HEPA-Type Filters (2) | |
| • IR remote control | • Extra bristle brush | |

Works on all types of floors. Detects debris optically to focus cleaning efforts. Includes a wireless RF remote.

The iRobot® Roomba® vacuum cleaning robot removes dirt, dust and pet hair, on its own, at the touch of a button, or can be scheduled to clean automatically up to 7 times a week. It thoroughly cleans your carpets, hardwood, tile and linoleum floors, including in tight spots, under and around furniture and along baseboards. Roomba features iAdapt™ Responsive Cleaning Technology that monitors the cleaning environment over 60 times per second, using multiple sensors and over 40 behaviors to maximize cleaning performance.

The 780.03 features Dirt Detect™ Series 2 technology to concentrate cleaning in the dirtiest areas and a full bin indicator that lets you know when the bin needs to be emptied. It also includes an IR handheld remote control to communicate with Roomba® and 2 Virtual Wall® Lighthouse™ to improve room-to-room cleaning coverage, and soft-touch capacitive controls.

700 SERIES

Design & Engineering Enhancements

ADVANCED CLEANING HEAD

Provides superior cleaning performance for picking up dirt, dust, pet hair, allergens and more from carpets and hard floors.

POWERFUL AEROVAC™ SERIES 2 BIN

Employs a powerful vacuum to vigorously pull debris and hair off brushes into the bin. An efficient single-chamber bin fills evenly and holds more debris than previous Roomba® series.

DUAL HEPA-TYPE FILTERS

Captures dust particles as fine as 0.3 microns — limiting the recirculation of fine particles and leaving fresher and healthier air behind.

EXTENDED-LIFE POWER MANAGEMENT

Uses sophisticated power management software to deliver up to 50% longer battery life than previous Roomba® generations, ensuring hundreds of cleaning cycles under proper use.

MOLDED SOFT-TOUCH BUMPER

Cushions the contact made between the surface of Roomba's bumper and walls, furniture and other objects in the room.

PERSISTENT PASS CLEANING PATTERN

Employs a brush-like, back-and-forth motion in areas where it senses excessive dirt and debris to focus cleaning effort.

ROOMBA 780.03 FEATURES

Vacuums on its own using iAdapt™ Responsive Cleaning Technology.

Works on carpet, hardwood, tile and linoleum.

Automatically recharges itself between cleanings.

Cleans on a schedule that's convenient for you.

Traps dust particles and allergens with dual HEPA-type filters.

Stays in the rooms you want to clean and out of the ones you don't.

Uses optical and acoustic sensors to detect large and small particles.

Indicator light lets you know when the dust bin is full.
